

WR-400 SDK Wireless Valve Demo Kit

SPECIFICATION

BUSINESS FIELD

- LANDSCAPE & TURF
- GREENHOUSE, NURSERY & INDUSTRIAL
- AGRICULTURE
- GOLF

The Tucor **WR-400-SKD** wireless valve demo is intended for sales presentations, counter displays and can be used as a site survey tool for field applications. The demo consists of a battery powered gateway and a battery powered DC latch receiver with a DC Latch solenoid.

The DC latch receiver is placed at the valve location and the attached solenoid is remotely activated from the Gateway. Once the once activation is confirmed the gateway is then placed into site survey mode to verify signal strength.

The kit is supplied with two different antennae, both at the gateway and at the receiver for use depending on site conditions.

All applications must be surveyed. Tucor will not accept returns of product based on the lack of field performance.

ALL APPLICATIONS MUST BE SURVEYED

TUCOR WR-400-WVD
